Large Increase in World's

the world's available stocks of wheat together with a sharp decline in corn caused weakness in wheat today. The close was at the bottom, July wheat being down 1%@1°c, Corn shows a loss of 1°c, Oats

A fair degree of strength was evident in wheat at the opening, the influence bement report and advices of delayed seeding operations northwest. Initial quotations on July were unchanged to %c lower the winter wheat as shown by the o'cial of many traders suiceent rain has fallen ernment report. As a result of this opinion there was a tendency to sell on the part of the pit traders. Bearish sentiment was accentuated by the downward course of prices in the corn pit. As the session advanced the wheat market became extremely weak. Reports from the northwest stated that the cash situation there was in a very demoralized condition. Additional force to the reports was given by heavy selling orders credited to houses with northwest conections. An increase of nearly two million bushels in the world's visible supply also had a depressing effect on the market. Under general selling July declined to 801-668 %c and the market closed with prices at the low point. May sold between 925c and 985c and closed at 225c. Clearances of wheat and flour were equal to 229,500 bushels. World's visible supply as shown by Bradstreets increased 1,719,000 bushels. Primary receipts were 281,800 bushels, compared with 302,00 bushels a year ago. Minneapolis, Doluth and Chicago reported

The market closed weak and near the bottom. July opened unchanged to 5c higher at 273,0375c, sold between May ranged between 36% and 38%c, clos-

Provisions were firm early due to small ru nof hogs and firm prices at the yards. the grain markets turned weak, heavy liquidation causing a rapid decime. Later market received fair support from packers, the close being about steady with July pork down 10c at \$12.35. July
